CUTROOM · CATALOG

Media skills: you choose what to download

Each component is only downloaded when chosen in `cutroom-init`. Generated by `cutroom catalog --json`.

Skills

- **cutroom-extract**: PDF, DOCX, PPTX, XLSX, HTML and images to clean Markdown/JSON before the LLM reads them (tables, reading order, OCR). The base for reports built from documents.
- **cutroom-diagram**: Interactive, self-contained HTML diagrams: architecture, flow, sequence, data flow, ERD, timeline. Ready to publish or export as PNG/SVG.
- **cutroom-math**: Scripted math and code videos in Python (3Blue1Brown style): formulas, plots, 3D, code typed line by line, narration in sync and captions.
- **cutroom-motion**: Video and motion graphics from HTML/CSS/GSAP: explainers, launches, PR videos, animated slides, captions. Renders mp4, webm, gif.
- **cutroom-voice**: Local narration in many languages: Kokoro presets, voice blends and saved profiles; local voice cloning with consent (Chatterbox).
- **cutroom-iso3d**: Animated, interactive isometric figures that explain a concept as a machine (Anatomy) or as a single line (Hairline). SVG/HTML.
- **cutroom-deck**: 16:9 PDF decks in the active brand, on any subject: the message in the title and illustrations computed from the data. Also self-contained HTML.
- **cutroom-graphic**: Static graphics in the brand: social posts and stories, thumbnails, OG images, posters, banners, infographics, certificates. HTML rendered to PNG, JPG, PDF or SVG at platform sizes.
- **cutroom-logo**: Logo design from brief to production files: concepts, SVG craft, 16 px and one-color tests, presentation boards and export variants, then installed into a cutroom brand.
- **cutroom-edit**: Post-production toolbox on ffmpeg: trim, concat, narration and music mix with ducking, loudness, burned captions, reframe to 9:16 or 1:1, watermark, GIF, contact sheets, web compression.

Components, tools and downloads

Skill	Component	Tool (license)	What it downloads	Size
cutroom-extract	extract	Docling 2.141 (MIT)	Python environment with CPU torch (1.5 GB) + layout, table, figure and OCR models (0.8 GB)	~2.3 GB
cutroom-extract	docling-mcp (optional)	docling-mcp 3.3 (MIT)	nothing: registers the 'docling' MCP server in Claude Code, using the extract environment	0
cutroom-diagram	diagram	Archify 3.2 (MIT)	official skill and dependency-free Node CLI + playwright-core (to record GIF/video)	~40 MB
cutroom-math	math	ManimGX 0.1.1 (MIT; wheels bundle x264, GPL)	Python environment 'media' (ManimGX ships ffmpeg, fonts and Typst)	~400 MB
cutroom-motion	motion	HyperFrames 0.8.183 (Apache-2.0)	HyperFrames CLI (npm) + 21 official skills; uses the system Chrome and ffmpeg	~150 MB

Skill	Component	Tool (license)	What it downloads	Size
cutroom-voice	voice	Kokoro-82M via kokoro-onnx (Apache-2.0)	Python environment 'media' (shared with math) + Kokoro v1.0 model	~400 MB + 340 MB
cutroom-voice	voice-clone (optional)	Chatterbox Multilingual 0.1.7 (MIT), 23 languages	Python environment 'clone' with torch (~1 GB) + Chatterbox weights from Hugging Face (~3 GB)	~4.5 GB
cutroom-iso3d	iso3d	Anatomy 1.1 + Hairline 0.5.1 (MIT)	official skills and dependency-free Node kits + playwright-core (checks and GIF/video)	~30 MB
cutroom-deck	deck	cutroom_deck (this repository, standard library only)	nothing: the library ships with the harness; prints PDF and previews with Chrome	0
cutroom-graphic	graphic	cutroom render (this repository) on the system Chrome	nothing: HTML templates and the renderer ship with the harness	0
cutroom-logo	logo	logo-design skill 1.4.5 (MIT), 1,400+ reference logos	official skill, dependency-free Python scripts and the reference library	~13 MB
cutroom-edit	edit	cutroom edit (this repository) on the system ffmpeg	nothing: recipes ship with the harness	0

Works in Claude Code, Codex, Antigravity and Kiro.
